

Todos, Todos

Continue your todo application with Vue and Vuex.

Please make sure your todo app has the following components:

- TodoApp (Routable, Smart)
 - TodoList (Dumb component)
 - TodoPreview (Dumb component)
 - TodoFilter (Dumb component)
- TodoEdit (Routable, Smart)
- TodoDetails (Routable, Smart)
- UserProfile(Routable, Smart)

New Tasks

- Use the given `async-storage.service` to return the data from the `localStorage` as a Promise
- Use Actions that return Promises
- Show Success and Failure messages from the component using the Store / EventBus
- Show a loading indication when todos are being loaded
- Split your store to 2 modules: user-module and todo-module
- Support filtering and sorting
- Support debouncing
- Support paging

Bonus

- Build a backend to your app (you can modify and use the backend from your missBug project)
